# ***MARBLE SHEETS***

*PVC*

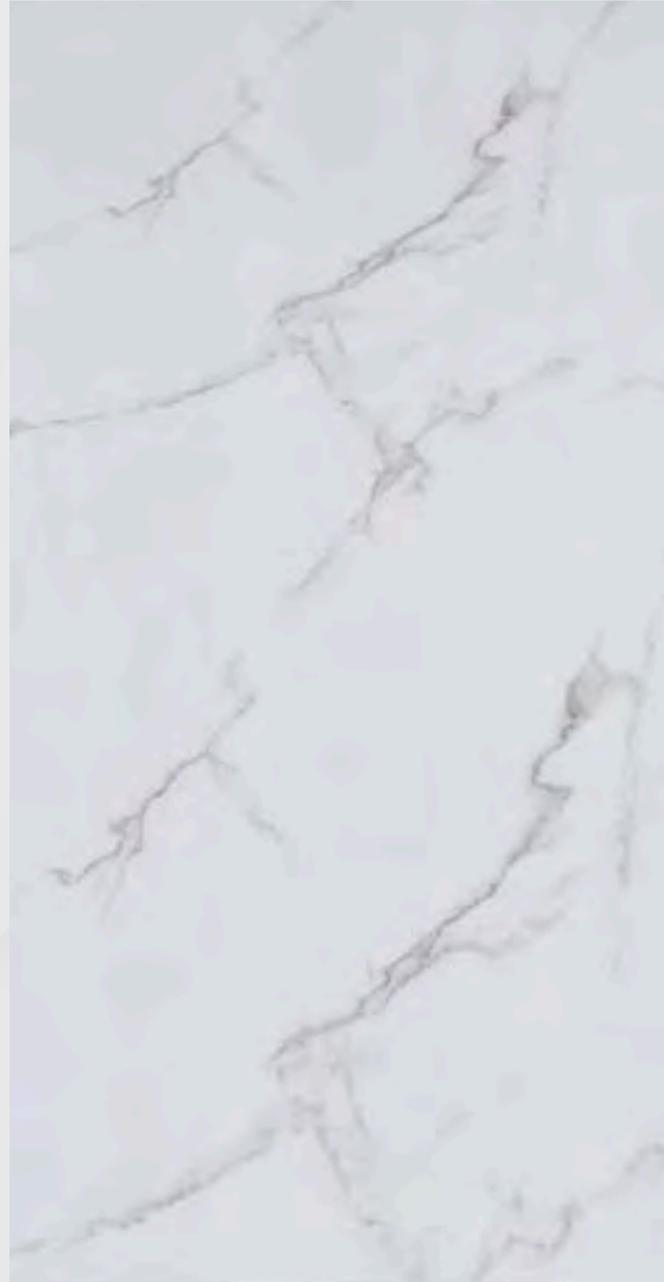

Marble PVC is a material that combines the properties of polyvinyl chloride (PVC) with a design that simulates the appearance of marble. It is a popular choice for interior cladding and decoration due to its durability, water resistance, and easy maintenance. It also offers a more economical alternative to natural marble, while retaining its aesthetic appeal.

**WEIGHT PER SHEET: 33.07LB**

***DIMENSIONS: Width: 48.03in / Length: 8,01 ft / Thickness: 0,118 In***

The image shows a modern building facade at night. The main wall is covered in vertical, dark brown WPC panels. Three small, square windows with white frames are visible on the left side. The building has a cantilevered upper section with a white railing, and a warm yellow light strip is visible under the overhang. The foreground shows a bed of light-colored gravel.
