MARBLE SHEETS

PVC

Marble PVC is a material that combines the properties of polyvinyl chloride (PVC) with a design that simulates the appearance of marble. It is a popular choice for interior cladding and decoration due to its durability, water resistance, and easy maintenance. It also offers a more economical alternative to natural marble, while retaining its aesthetic appeal.

WEIGHT PER SHEET: 33.07LB

DIMENSIONS: Width: 48" / Length: 8 ft

FOAM BOARD

LIGHT OAK

DIMENSIONS: Width: 48" / Length: 8 ft

The image shows a modern building facade at night. The main wall is covered in vertical, dark brown WPC panels. Three small, square windows are visible, each with a white frame. The building has a cantilevered upper section, and the underside of this overhang is illuminated with a warm, yellow light. The sky is dark, and the overall scene is lit by the building's ambient lighting.
